SuperFirst, referring to Cheetah Games players are quite impressed with their products being released a lot on Google Play. Most of them are casual games with easy gameplay, and the game's operating system is simple. On the contrary, that has become the biggest weakness of this editor. They have no significant advances like piano titles. So it's still your most successful product to date. Part 2 of it is also a necessity comes naturally. But in general, they do the best they can. Therefore, this product still meets the maximum requirements that the player offers in both game and graphics. They retain their identity and provide new enhancements to make the game process smoother. #1 music game About the game, following the success of Piano Tiles, will come to this version of Piano Tiles 2. Like the previous one, the rules of the game are simple. You will select your favorite tracks and then click on the continuously falling black boxes from the top of the screen. A screen will have 4 lanes; the black note will fall randomly there. Make sure you don't ignore any black boxes so that the game requires a little skill in the match. Because it simulates the piano keyboard, some of you may have mistakenly pressed the white key during the game. But that's wrong; the player has to touch the black button, not for the white button because it makes you lose. More 10000 soundtrack This makes you focus on an object, so you're less likely to make mistakes during the game (due to the black contrasts perfectly with the game's graphics). But you have to use money or diamond to unlock the song. And you should know that the more famous songs like Alan Walker's, the more money they have, the more money they'll have to buy in the game's private store. In the background, all you have to do in this game is touch the black piano keys and avoid the white keys. You lose when you touch the white keys, and the music can be interrupted if you skip some black piano keys. A notable change in the game is that this time, the game appears some stretching melodies and requires you to touch and hold it until the end. Create a variety in the process of playing a piece of music instead of hitting each key like the previous version. This is really a great addition. Thousands of famous songsIn a music theme game, so music is an indispensable part. And of course, Piano Tiles 2 doesn't disappoint us. During the game, you will enjoy the famous songs of Mozart, Beethoven, ... that you're the ones who play those songs. Sounds great, doesn't it? Not only that, recent hits like Alan Walker's Faded or Reality Appear. After playing Piano Tiles 2, I found the names of many songs I had accidentally heard somewhere, but I couldn't figure out what name they were. Thank you for Cheetah Games! MoneyGold and diamonds are the two types of money in Piano Tiles 2. Used to unlock new tracks or buy a life you lose (note that you can only buy it once with two diamonds). Gold can be earned by leveling up or collecting during music playback. Diamonds can only be earned by viewing ads or buying them in cash. Each day, the game gives you 30 lives corresponding to 30 times of gameplay. When the number is over, you can buy more or wait to receive 1 life every 5 minutes. In Piano Tiles 2 MOD, the game gives you unlimited amounts of gold and diamonds so you can unlock any music you want. However, it is necessary to reach the required level of each track to unlock. The interface has been improvedContrary to the monotonous interface with only two black and white colors of a piano, the Piano Tiles 2 interface has been added with a lot of colors and stunning effects. Many colors don't mean it's messy. The game's home screen is still harmoniously designed, giving you a good focus on the process of playing your favorite songs. In addition, the game also allows you to save data when syncing with your Facebook account. This is quite necessary when you buy a new phone or deleted the game.
